Double-Sided DVD

This DVD is a double-sided disc. A DVD device always reads the side of the disc that is facing down. This DVD is labeled like a normal DVD – the label you see as you place the disc into the tray applies to the data on the opposite side. If you are installing Kubuntu, the Kubuntu label should be facing up in the tray.

DVD Boot

Place this DVD in the drive and restart your system. If your computer doesn't start, make sure your BIOS is configured to boot from a DVD. Enter the BIOS setup menu (see your vendor documentation), make sure DVD boot is enabled, and make sure the DVD drive appears before the hard drive in the boot order.

DEFECTIVE DVD?
Defective DVDs will be replaced. Please send an email to cs@ubuntu-user.com.

On the DVD: Ubuntu and Kubuntu 10.10

INTRODUCING "MAVERICK MEERKAT"

UBUNTU user

Included with this issue is a double-sided DVD with Ubuntu 10.10 and the popular KDE-based Ubuntu variant Kubuntu 10.10. Use the handy "Try Ubuntu" option to explore the new Maverick Meerkat release without disturbing your current configuration. A new re-tooled installer makes it easier than ever before to try out Ubuntu. The latest version also includes a new image manager, as well as enhancements to the Software Center and other improvements. See page 80 for more information on installing Ubuntu 10.10.
